- ✓ **Continuity & reputation**
Since 1995, we're proud to have worked with organisations like Capita Maclaren, Fox Entertainment, NASDAQ, Hyundai, Woolworths - as well as Government and many SMEs

Is your company on the move?

Or are you relocating an internal department?

If so, then ITC may be able to help.

Moving, adding and replacing staff around an office or offices can prove to be a costly and disruptive exercise that presents all manner of logistical problems.

ITC have teams of engineers with extensive knowledge and experience of Voice and Data systems dedicated to managing and executing these types of projects to exacting standards.

Specifying a structured cabling system that will meet the long-term communications needs of your company is a challenging task. It is vital to install a system that provides optimum performance with adequate headroom to accommodate future technology. The system must also be flexible, able to provide unfailing end-to-end performance regardless of the number of moves, adds, and changes made.

At ITC, we'll help you make the right move

Using the very latest cabling systems and processes, RCDD designers, BICSI qualified engineers, and a 25-year underwritten system guarantee; ITC is perfectly positioned to support for all your moves, adds and changes.

Our experienced and accredited Project Managers and infrastructure specialists have helped move thousands of employees for government and corporate organisations throughout the UK. Working in close partnership with some of the UK's leading Design & Build companies, ITC have helped make life a little easier for IT, Facilities and Operations Managers responsible for company change.

Our expert engineers can help you:

- Assist, or manage the entire move, liaising with all third parties to ensure a timely completion
- Specify and install network infrastructure that will cost-effectively meet the long-term communications needs of your company
- Maximise available resource to better manage moves, adds and changes – reducing associated maintenance time and cost

Project Management

Critical to these projects is project management!

ITC offer full lifecycle management of the project from initial "pre-move" auditing right through to "go live", where engineers are on hand to ensure every thing runs to plan, on time and within budget, removing the burden from the client.

- Pre Move Auditing and "Scope of Works" definition
- Liaison with all third parties involved (e.g. Design & Build / Relocation Companies / Furniture Installers)
- Standard working-hours / out-of-hours engineering availability.
- National engineering coverage
- "Go live" engineering attendance
- Full documentation, for smooth management following completion

Systems and Technologies

ITC have a wide range of engineering skills to draw on and can work with a wide range of systems and technologies.

- From the cabling perspective, ITC can install whatever is needed to match your existing infrastructure
- ITC have qualified network equipment engineers who can work with your I.T. department to deliver moves, adds and changes to your network switches
- ITC can also provide Telecomms support, for additional new users

About ITC Connects

ITC designs, delivers and supports Network LAN Infrastructure for companies in the Southeast. Our clients include government, blue chip and growing companies, who seek industry-leading experts for open, unbiased consultancy and cost effective infrastructure solutions. ITC is also one of the UK's leading Cabling specialists for the Design & Build community.

Unlike our competitor's, ITC principally installs in Central London and Canary Wharf. This allows us to provide a better, more focused, fully managed service at competitive cost, helping you to reach your business objectives on time and within budget.

ITC Connects services

- | | |

| ✓ Moves & Changes | ✓ Audio Visual |
| ✓ Voice & Data over Cat5e, Cat6, Cat7, Fibre & Wireless | ✓ Maintenance & Managed Services |
| ✓ Communications Room Design & Build | CONSULTANCY: |
| ✓ Power & Power Backup | ✓ Infrastructure Audits |
| ✓ Active Hardware Provisioning | ✓ Pre-Tender Consultation |

FREE Pre-Sales Consultation

Depending on the scope of the project, pre-sales meetings usually last for less than 2 hours and are without obligation and free of charge.

Warranty Program

ITC offer clients a 25 Year Product, System and Application guarantee through Molex's Global Warranty program.

Providing one of the most comprehensive warranty programs in the industry, this program combines all of the key elements of the cabling infrastructure: design, cable, connecting hardware, installation, testing and commissioning to create a homogenous system.

The Technology

ITC only use the latest tried and tested technology to support your business.

Accredited to work with all industry-leading technologies, our world-class cabling and network experts take an independent view to ensure you receive the right solution.
